de Suisse occidentale

LSDS research group

- ◆ Large Scale Distributed Systems (LSDS)
 - ◆ High Performance Computing
 - ◆ Volunteer Computing
 - ◆ Cloud Computing
- ◆ Works at hepia (Geneva)
 - ◆ Part of HES-SO

Our infrastructure

Our OpenStack related-projects

- ◆ XtremWeb-CH
 - ◆ Volunteer Computing Middleware
 - ◆ Developed since 2003
- ◆ SwissCloud
 - ◆ OpenStack and Microsoft Azure
- ◆ CleanCity
- ◆ SlipStream™
 - ◆ Developed support for OpenStack

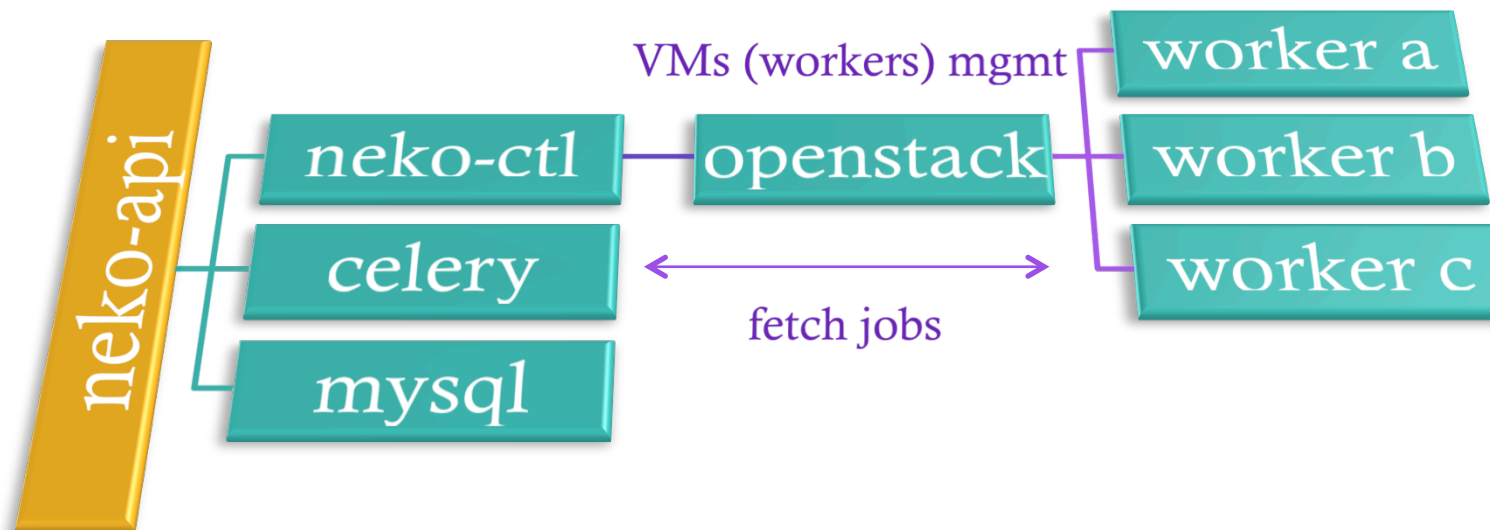

Our cloud platform

- ◆ OpenStack Folsom
 - ◆ Multi-nodes and multi-tenants installation
 - ◆ Runs on over than 40 machines
- ◆ What we use OpenStack for
 - ◆ Extend XWCH infrastructure
 - ◆ Educational purposes (Bachelors and Masters)
 - ◆ Deploy scientific applications (SwissCloud)

Our OpenStack activities

- ◆ Expertise in OpenStack installation and maintenance
- ◆ Development of several APIs for resources access and use
 - ◆ Java API: jOsApi
 - ◆ Used by students to start jobs on the infrastructure
 - ◆ Python API in development: Neko
 - ◆ Used to provide jobs platform with transparent cloud resources management

Our OpenStack activities

Our OpenStack activities

- ◆ SlipStream™
 - ◆ Multi-machine Provisioning System
 - ◆ Multi-cloud Provisioning
 - ◆ Support continuous integration processes with continuous deployment
 - ◆ Independence from specific IaaS interfaces and hypervisors
 - ◆ Used to provision instances on our OpenStack infrastructure

Thank for your attention
