Internship: Start up company to do business between Switzerland and the Kingdom of Bhutan

- Introduction: On our recent visit to Bhutan we did not only discover a beautiful and magical country but also an exiting business idea. Bhutan has many well educated young professionals and the government has invested heavily in the set-up of a modern IT Park in the capital city of Thimpu. It is our goal to outsource tasks which can not be provided cost efficiently in Switzerland to Bhutan and create jobs and employment opportunities there.
- Service: We organize our customers digital photos & film and present it as a state of the art digital display service on any device. Customers are relieved from the time consuming task of organizing and sorting their digital photos. We want to provide a useful service, which is a pleasure to use and makes our customers happy.
- Task: Help define business plan, identify potential project partners and assist in the execution of the plan. Be part of the team to turn the vision into action!
- Organization: TSS AG will initially serve as the legal structure to launch the first service to test market acceptance. As soon as all project partners are together, a separate legal unit will be founded (AG or GmbH) and all relevant project partners are invited to participate in it.
- Job Description: Young professional digital native with at least a bachelor degree in online marketing or IT. Fluent in English and German. Motivation and dedication to create some new exiting services with which we make our customers happy and generate jobs in Bhutan.
- Start: as soon as possible, part time or fix. To be negotiated. Could potentially be part of a master thesis.
- Contact: Please contact Matthias Wolfensberger for a personal interview to find out if our goals match. m.h.wolfensberger@tssag.com or +41 44 926 74 33
