

# OpenStack summit

Impressions from ..

Muharem Hrnjadovic  
@al\_maisan

# Wow!

- 2600 people
- Standing room only in talks
- 80+ people in dev sessions
- Next summit: Hong Kong in November

# Momentum!

- Adoption by BestBuy, PayPal, NSA etc.
- Devs churn out features like clockwork
- Vibrant eco system
  
- Ericsson & Juniper join as gold members

# New kids on the block

- Lot of attention on heat & ceilometer
- Rackspace to contribute its auto-scaling piece to heat
- HP (and IBM?) also jumping in
- prerequisite: ceilometer's monitoring & alerting

# What's core?

- Plenty of opinions on OpenStack core
- Core criteria will be available “at some point”
- Once the criteria are defined all projects to be (re-)evaluated?

# “Linux of the cloud”

- Reminds me a lot of linux (~ '97)
- **BUT** 10x faster
  - Drove of companies putting hordes of **very smart** people to work
- The future is bright :-)

# Off-topic!

- Any German speakers here?
- What reads better?

Cloud Computing

ist die Zukunft der IT
